UserWay's Al-Powered Accessibility Widget leverages advanced artificial intelligence (Al), Machine Learning (ML), and computer vision technologies to provide compliance and accessibility. These automated technologies coupled with human review and approvals ("Human in the Loop") ensure this site meets, and exceeds, WCAG 2.1 AA standards.

This report delineates a high-level overview of the remediations provided by UserWay's Al and shows site compliance levels on the date of report generation.

UserWay's AI continuously monitors and remediates all accessibility violations detected on this site based on UserWay's exhaustive WCAG 2.1 AA rulebase. UserWay ensures that the latest requirements, rule bases, and remediations are applied as the W3C (the World Wide Web's standards body) authors new WCAG guidelines and adapts existing WCAG guidelines to evolving technologies, browsers, and devices. WCAG standards are the guidelines that serve as the basis for the legal accessibility standards as required by the ADA, AODA, EN 301 549, RGAA, and other regulatory bodies around the world.

Accessibility Violations by WCAG Criteria

Image lacks a required 'alt' attribute (Level A)

Checks that each image has an alt attribute with a sufficiently clear and concise description to convey the meaning of the image to visually impaired users relying on screen readers and other assistive technologies.

URL	312 Occurrences	Status	Detected on
sendlowirral.co.uk/	6	Remediated	Desktop
sendlowirral.co.uk/add	4	Remediated	Desktop
sendlowirral.co.uk/news	3	Remediated	Desktop
sendlowirral.co.uk/adhd	4	Remediated	Desktop
sendlowirral.co.uk/ehat	3	Remediated	Desktop

Frame lacks a populated 'title' attribute (Level A)

Checks that all frames have populated title attributes. Users who rely on screen readers or other assistive technologies often use shortcut navigation methods to view a list of frames and their title attributes. A descriptive title attribute that identifies the frame's content or purpose helps these users.

URL	238 Occurrences	Status	Detected on
sendlowirral.co.uk/	3	Remediated	Desktop
sendlowirral.co.uk/add	3	Remediated	Desktop
sendlowirral.co.uk/news	3	Remediated	Desktop
sendlowirral.co.uk/adhd	3	Remediated	Desktop
sendlowirral.co.uk/ehat	3	Remediated	Desktop

Link lacks descriptive text (Level AAA)

Checks that each link contains descriptive text that clearly and meaningfully describes what will happen if the user selects it. Without descriptive text, a link can confuse users who rely on screen readers or other assistive technologies. If it is not possible to add link text, add an 'aria-label' attribute to describe the link instead. Or, if the link is necessary for the programming or functionality of the page but is not intended for user interaction, add an 'aria-hidden' attribute to hide it from screen readers.

Form field lacks a <label> element (Level AA)

Checks that each form field has an associated <label> element or descriptive text. Without labeling or description, users who rely on screen readers or other assistive technologies cannot determine the input requested.

New tab or window opens without warning user (Level AAA)

Checks for new tabs or windows opening without warning user. New tabs or windows can be very disorienting for users, particularly those who rely on screen readers or other assistive technologies. Any link that opens a new tab or window should communicate this fact beforehand.

URL	96 Occurrences	Status	Detected on

Vague or undetermined link purpose (Level A)

Checks for vague link text that does not provide clear information on where the link leads to. Users who rely on screen readers or other assistive technologies often skip forward or backtrack to locate links. They need link text to be substantive. Vacuous, meaningless link text like click here, click this, download, etc. tell users nothing about what the link points to.

Skip link missing for user to skip navigation or other repetitive content (Level A)

Checks for a mechanism that allows users to skip navigation and other repetitive content atop each page. Most websites repeat the main navigation or other content (banner links, etc.) at the top of each page. For users who navigate with a keyboard or other assistive technologies, having to tab through such repetitive content on each page is laborious, time-consuming and considered an accessibility barrier.
